

Managing Remote Work

Tracking the attendance and productivity of your remote employees doesn't have to be a hassle. Breeze 360 is a cloud-based solution that is accessible in-office, or away, making it perfect for remote or hybrid working conditions.

Managing Remote Work Just Got Easier

Ease of Access

Breeze 360 allows workers to punch in and out through web or the mobile app, making off-site work easier to track.

Easy Leave Management

Employees can make leave and vacation requests from the Breeze 360 app or online, streamlining approvals.

Online Reporting

Create reports based on employee location and get a clear perspective on worksite efficiency.

Real-time Data

Your remote workers can log in from anywhere, and you'll know instantly. By setting notifications and geofencing, you can get notified when someone punches in or out at a designated work area.

Productivity Management

Managers and HR can view time worked on specific projects and tasks for simple productivity tracking.

Flexible Out-of-Office Working Solutions

Dashboard Views

Send reminders and messages to employees, manage and approve employee worksites with just a few clicks from the admin dashboard.

Live In/Out Board

View employee work status and location instantly online or with the mobile app.

Mobile App Capability

Remote workers can easily punch in through the mobile app from anywhere.

Geofencing

Geolocation tracking options within the Breeze 360 mobile app give the ability to manage multiple work sites, and even view projects worked per site.
