Mobile & Kiosk Apps

Get all the tracking and analysis capability of Breeze 360 from a central punch station with the Breeze 360 kiosk app for iOS. Punch in and out using radio frequency ID cards for contactless clocking in and out, as well as touch screen punch using username and password.

Punching In Made Simpler

Contactless Punching
The Breeze 360 Kiosk App supports the use of RFID for punching in and out, for the ease and safety of your workforce.

Easy Leave Management
Employees can make leave and vacation requests from the Breeze 360 apps or online. Managers can also review requests from the apps, streamlining approvals.

On the Go Ability
Breeze 360 for iOS and Android provides convenience for your business, making it easy to record time and request time off.

Real-time Data
The mobile and kiosk apps are continuously updated, guaranteeing up-to-date info each time you log in. Obtain key insights on attendance trends, requests, and productivity wherever you are and exactly when you need it.

Automated Leave Approval
Managers can easily approve leave requests with our automated leave approval process, even from the app.

A Flexible Tool to Automate
Time & Attendance

Accessible
The Breeze 360 Kiosk App is easy to use, and a great option for employees with different needs. Breeze 360 and tutorial videos are also available in Spanish.

Mobile App Capability
Take the power of Breeze 360 with you anywhere, and manage employees and projects on your time. Give your employees the convenience of punching in and out wherever the project takes them.

Geofencing
Allow employees to punch in from remote work locations through the app. Employees can choose to punch in manually or autmatically through app permissions.

Accessible And Intuitive Solutions For
Your Workplace
